

**IRO Certificate #4599**

**NOTICE OF INDEPENDENT REVIEW DECISION**

September 24, 2002

**Re: IRO Case # M2-02-1049-01**

Texas Worker's Compensation Commission:

\_\_\_ has been certified as an independent review organization (IRO) and has been authorized to perform independent reviews of medical necessity for the Texas Worker's Compensation Commission (TWCC). Texas HB. 2600, Rule 133.308 effective January 1, 2002, allows a claimant or provider who has received an adverse medical necessity determination from a carrier's internal process, to request an independent review by an IRO.

In accordance with the requirement that TWCC assign cases to certified IRO's, TWCC assigned this case to \_\_\_ for an independent review. \_\_\_ has performed an independent review of the proposed care to determine if the adverse determination was appropriate. For that purpose, \_\_\_ received relevant medical records, any documents obtained from parties in making the adverse determination, and any other documents and/or written information submitted in support of the appeal.

The case was reviewed by a physician who is Board Certified in Neurological Surgery. He or she has signed a certification statement attesting that no known conflicts of interest exist between him or her and any of the treating physicians or providers, or any of the physicians or providers who reviewed the case for a determination prior to referral to \_\_\_ for independent review. In addition, the certification statement further attests that the review was performed without bias for or against the carrier, medical provider, or any other party to this case.

The determination of the \_\_\_ reviewer who reviewed this case, based on the medical records provided, is as follows:

History

This case involves a now 37-year-old male who was lifting and slipped over a hose and pallet on \_\_\_. Back pain, extending into both lower extremities, especially on the right side, persists despite considerable conservative measures. An MRI on 2/1/02 shows mid line disk rupture with extension to the right side at the L5-S1 level. A CT myelographic evaluation 4/1/02 failed to reveal any signs of surgical pathology. Some findings were present, but not related to nerve root compression.

Requested Service

Discogram

Decision

I agree with the carrier's decision to deny the requested procedure.

Rationale

The results of discography will not change the obvious probable course of action if the patient's discomfort continues. An L5-S1 discectomy is the logical course to pursue, if the patient understands that there is no guarantee that it will resolve his trouble. Neither testing nor examination suggests that the L4-5 level is the potential source of difficulty.

This medical necessity decision by an Independent Review Organization is deemed to be a Commission decision and order.

**YOUR RIGHT TO REQUEST A HEARING**

Either party to this medical dispute may disagree with all or part of the decision and has a right to request a hearing.

**If disputing a spinal surgery prospective decision**, a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **10** (ten) days of your receipt of this decision (28 Tex. Admin. Code 142.5(c)).

**If disputing other prospective medical necessity (preauthorization) decisions**, a request for a hearing must be in writing, and it must be received by the TWCC Chief Clerk of Proceedings within **20** (twenty) days of your receipt of this decision (28 Tex. Admin. Code 148.3).

This decision is deemed received by you 5 (five) days after it was mailed (28 Tex. Admin. Code 102.4(h) or 102.5(d)). A request for a hearing should be sent to:

Chief Clerk of Proceedings, Texas Worker's Compensation Commission, P O Box 40669, Austin, TX 78704-0012. **A copy of this decision should be attached to the request.**

The party appealing this decision shall deliver a copy of its written request for a hearing to all other parties involved in the dispute (Commission Rule 133.308(t)(2)).

Sincerely,
